Care of Stock to Pail and Winter. It is scarcely necessary to advise farm-re to take good care of their choice stock, or this is generally done. When a man pays a high price for enything, he usually values it is proportion to its cost, and tends and cares for it accordingly, but that which costs hittle, is seldom valued, however useful it may be. A Shorthorned, Dovon of Hereford is taken home and well subled and fed. If a calf, it gets the best of everything, because forecoth, size and perfect development are desirable both for exhibition and breeding; but the common or low grade animal is looked upon as unworthy such care, or in fact. care, and yet the principal end in view any care, and yet the principal and milk. If good care aids materially in enhancing the value of a high bred animal, it wil have a like effect in a less degree upon common stork, and we believe it will pay. Dairy stock, bred or selected with reference to their milk-secreting powers, will deteriorate if placed in un'avorable con titione. And the first evidence of a change is either the amount of milk secreted, or its quality. When it requires all the ford generally, at the tancaster, July 12, 1869—1517 flow of milk will stop, especially if she has flow of milk will stop, especially if she has no calf by her site. It is therefore the FRUIT JARS interest of the dairyman to fee I well, with that particular kind of fool that is best for aiding this secretion. When the shelter is good, less food is necessary than when the animal is exposed to the weather, because the carbon or fat that is not needed for heating purposes during warm weather, or when sheltared, is supplied and expended in proportion to the amount of exposure and lowness of the temp - rature in which the animal is placed. Cows giving milk do not get fat, for the for d is expended in the production of milk, the cream being merely sliightly changed animal fat. This shows that the two qualities of ment and milk do not reach their maximum in the same animal at the same time. Nor can a cow be made to yield milk in a proper quantity or quality, when she has at the same time to resist the influence of a low temperature. In coun tries where particular bree's of cattle, Ayrebires for example, are kept for milk almost exclusively, they are kept under shelter during the whole of the winter. and supplied in abundance with such food as goes to milk. The result is that nearly the same amount of milk is obtained during winter as in summer, the cows not losing flesh either by cold, want of food, or exertion. With like care, the same would be the result here; and it is worth trying, for many cows do not pay for their keeping during winter, with the poor care they receive. - Ohio Farmer. Professor Horsford's Mode of Preserviu; Cider.

We have been asked so many time to reprint the excellent recipe of Professor Horsford for arresting the fermentation of cider or other saccharine juices at any desired point, that we lest bound to comply. We have tried the experiment so as to sat lefy us of its value, and recommend our readers to do likewise. Our plan has been to add the sugar at an early stage of the fermentation, and the sulphite soon afterward, and in somewhat larger quantity than has been recommended. The august language of the langua |-aneaster, April 19, 1860-21f than has been recommended. The sugarmakers add the sulphite as soon as the juice is expressed. Dr. Ure says the actation by absorbing oxygen, and thereby JOHN MORRISSEY! tion of sulphur is to obstruct the fermen preventing the elimination of yeast parti-

"When the cider in the barrel is under going a lively formentation, add as much white sugar as will be equal to builf or three-quarters of a pound to each gallon of eider, let the fermentation proceed until the liquid strains the right taste to suit; then add an ounce of sulphite (not sulphate) of lime to each gallon of eider in the cask, first mixing the powdor in abou a quart of cider, and then pouring it back into the cask, and giving it a thorough shaking or rolling. After standing burged up a few days, for the matter added to become incorperated with the cider, it may be bottled or used from the cask. "Dou't mistake sulphare of lime, which

is a natural production, and known a plaster of Paris, for sulphite of lime which is a manufactured article and is worth by barrel about 33 cents a pound and by the owt. 374 cents, and by the single pound 50 cents. It has been of late years much used by sugar-makers to prevent fermen tation of cane juice; and in our opinion it will be found more effective as a prevent will be found more effective as a prevent twill be found more effective as a prevent that an arrester of it after it has proceeded nearly owt. 374 cents, and by the single pound rester of it after it has proceeded nearly to completion .- New York Tribune.

STARTLING DISCOVERY .- During the sitting of a Court in Connecticut, not long ago, on a very cold evening. A crowd of that blazed cheerfully on the hearth in the bar room, when a traveller, entered, benumbed with cold; but no one moved to give him room to warm his shine, so he leaned against the wall in the back part of

Presently a smart young limb of the law addressed him, and the following dialogue Finest and Most Fashionable took place:

"You look like a traveler." "Wall, I suppose I sm; I come all the way from Wisconsin afoot, at any rate." "From Wisconsin! What a distance to eome on a pair of legel"
Wall, I done it, anyhow."

"Did you over pass through bell in any of your travels?" 'Yea, sir; I have been through the out-

akirta." "I thought likely Well, what are the b manners and customs there? Dome of us would like to know."

"Oh, you'll find them much the same as in this place-the lawyers sit nearest the H. L. CRIDER,

HOSTETTER'S STOMACH BITTERS.

proprietors and manufacturers of HOS TETTER'S CELEBRATED STOMACH BIT-TERS can appeal with perfect confidence to physicians and citizens generally of the United States, because the article has attained a reputation heretofore unknown. A few facts upon this point will speak more powerfully than volumes of bore assertion or blazoning puffery. The consumption of Hostetter's Stemach Bit-ters for the last year amounted to over a half-million bottles, and from its manifest steady increase in times past, it is evident that during the coming year the consumption will reach near one million bottles. This immense amount could never have been sold but for the rare medicinal properties contained in the prepara-tion, and the sanction of the most prominent physicians in those sections of the country where the article is best known, who not only recommend the Bitters to their patients, bu are ready at all times to give testimonials to its

are ready at all times to give testimonials to its efficacy in all cases of stomachic derangements and the diseases resulting therefrom.

This is not a temporary popularity, obtained by extraordinary efforts in the way of trumpeting the qualities of the Bitters, but a solid estimation of an invaluable medicine, which is destined to be us enduring as time itself.

Hostetter's Stomach Bitters have proved

and various other billous complaints have counted their victims by hundreds. To be able to state confidently that the "Bittera" are a certain cure for the Dyspepsia and like diseases, is to the proprietors a source of un-alloyed pleasure. It removes all morbid matter from the stomach, purifies the blood, and imparts renewed vitality to the nervous system. giving it that tone and energy indispensable for the restoration of health. It operates upon the stomach, liver, and other digestive organs, mildly but powerfully, and soon restores them

to a condition essential to the healthy discharge of the functions of nature. Elderly persons may use the Bitters daily as per directions on the bottle, and they will find in it a stimulant peculiarly adapted to comfort declining years, as it is pleasant to the palate, invigorating to the bowels, excellent as a tonic and rejuvenating generally. We have the eviwho have experienced the benefit of using this preparation while suffering from stomach derengements and general debility; acting under the advice of physicians, they have abandoned all deleterious drugs and fairly tested the merits of this article. A few words to the gentler sex. There are certain periods when their cares are so harassing that many of them sink under the trial. The relation of mother and child is so absorbingly tender, that the mother, especially if she be young, is apt to forget her own health in her extreme anxiety for her infant. Should the period of maternity arrive during the summer season, the wear of body and mind is generally aggravated. Here, then, is a necessity for a stimulant to recupe-rate the energies of the system, and enable the mother to hear up under her exhausting trials and responsibilities. Nursing mothers generally prefer the Bitters to all other invigorators that receive the endorsement of physicians, because it is agreeable to the taste as well as certain to give a permanent increase

of bodily strength.

All those persons, to whom we have particularly referred above, to wit: sufferers from fever and ague, caused by malaris, diarrhæs, dysentery, indigestion, loss of appetite, and all diseases or derangements of the stomach, superannated invalids, persons of adentary eccupation, and nursing mothers, will consultable own physical welfare by giving to Hos-tetter's Celebrated Stomach litters a trial. CAUTION.—We caution the public sgainst using any of the many imitations or counter-feits, but ask for HOSTETTER'S CELEBRATED STOMACH BITTERS, and see that each bottle has the words "Dr. J. Hostetter's Stomach Bitters" blown on the side of the bottle, and stamped on the metallic cap covering the cork, and sbscrve that our autograph signature is on the

WHEN BK. ROBACH, the celebrated Swedish Physician, introduced his Blood Partier and Blood Pills in the United States, he set forth in delir language their curative preperites. This was year ago. The task of recommending them has since bear them sat of his hands. Eatightened men whose character for sound indgment and philosophy, gives their opinions weight in the community, men who observe reflect, and make "massrance doubly sure." before they decide—are everywhere approving and urging the use of these wooderful Preparations. All the confident the wisdom and honesty of this class, or whe chose in investigate for themselves are not of a wind on this important subject.

The evidence in the possession of Dr. Hoback, which is naid interesticate the public, establishes the following That the BLOOD PURIFIER and BLOOD PILLS, havebeen proved by analysis to CONTAIN NO MINERAL.

The they cure the almost environal completes.

With marring certainty, and in a very short time. That after all other medicines have proved useless, they relieve

Blood Purifier and Blood Pitter

CANDINAVIAN REMEDIES

with unarring certainty, and in a very aborttime. That after all other modicines have proved usaless, they relieve Liver COMPLAINT, and restore the health and strength of them forer. That SICK FEMALES, who have langulabled for years in helpless weakness and despondency, recuperation. That all sexual disabilities are removed by their cordinated gonile attenuisting operation. That all sexual disabilities are removed by their cordinated gonile attenuisting properties. That they recruit SHATTERED CONSTITUTIONS. however they may have been trified with and abused; that their direct tenduncy if to fengthen life, and render tendoyable. That, operating directly upon the session of disease in the blood.

THEY CAUSE TO HEAL, and discharge from the system, every tain to fiscrofule whether hereditary or otherwise. That they RECRUIT THE DEBILITATED. and that there is no disease of the Stomach and Bowels, the Liver, the nervous system, the skin, glanda or muscles, in arising from impurities in the Hood of Secretions, which they do, not give prosuper siles, and, (if administered before the very citudel of the last been invaded, effect spusifiess and perfect cure.

Bear in mind that the SCANDIN AVIAN VEGRTABLE BLOOD PILLS are endorsed by the experience of thousands of living witnesses, who, in steres, and extensionally for the strength every aronus and organ of the system, and to expel it thoroughly and permanently.

No are can doubt their superiority after one single trial—they are not only better but, in fact, encaper than any other Pills, for it takes a less number of them to produce a better effect.
